This list reflects the status as of March 18 and will likely change from week to week. Please check back for updates.

☐ Complete the request form and submit to covidsupplies@gnyha.org. Be sure to note if you would accept an alternate manufacturer or functional equivalent.

☐ Use the ticket number sent after processing to reference the order (please do not resubmit the same request).

☐ Limit order size to a one-week supply. Larger orders likely will be denied.

☐ Be aware that only hospitals will receive N95s masks. Hospitals should also note that they may receive expired masks, as supply is limited. Please reference our information on the use of expired personal protective equipment and conservation strategies.

☐ For immediate N95 needs, request model # 3M 1860 (regular and small). Requests for other brands will be sourced by other government entities and fulfillment may be delayed.

☐ Be prepared to pick up N95 masks from 390 Flushing Avenue in Brooklyn, NY.

☐ Be aware that no wipes or hand sanitizer are available in local supply. Requests for these items will be elevated to New York State.

☐ Requests from facilities outside of New York City must be sent to the appropriate County OEM.
