COVID-19 MINDFULNESS
BOOSTING YOUR CAPACITY UNDER STRESS

THE CHALLENGE
Workload intensity, change, and uncertainty during the COVID-19 pandemic can deplete cognitive and emotional resources, resulting in reduced performance and increased stress.

One technique proven to increase cognitive and emotional resources is Mindfulness.

Mindfulness is...
Mental training to focus attention on the present moment without elaboration or judgment

Mindfulness in the Military
Mindfulness has been trained and researched across the US military\(^1\)\(^-\)\(^4\)

Why use Mindfulness now?
The stress of the COVID-19 pandemic creates additional demands on our cognitive and emotional resources.

Mindfulness can help you to
- Recharge mentally and physically
- Enhance performance and decision making under stress

Fundamental Mindfulness: Mindful Breathing

1. Take a moment to get comfortable
2. Feel free to close your eyes
3. Settle in and let go of any unnecessary tension in your body and mind
4. Take deep and slow breaths
5. Focus your attention on the inhale and exhale
6. Notice when your mind wanders to a thought, feeling, or sensation... then gently bring your attention back to the present moment
7. Practice this exercise for 2-3 minutes
8. Gently bring movement back into hands and feet, as you complete the practice and return to everyday life

Mindfulness results in better
- Operational performance\(^4\)
- Attention\(^1\)\(^-\)\(^3\)
- Mental Focus\(^1\)\(^-\)\(^3\)
- Emotion regulation\(^3\)\(^,\)\(^5\)
- Mood\(^3\)
- Sleep\(^5\)

Recommendations to get the most out of your practice
- Accept what comes up without judgment
- Be patient with yourself as your mind wanders
- Mind wandering is normal and expected – just bring your attention back to your breath
- Let go of trying to DO mindfulness
- Strike a balance between alertness and relaxation – some effort is needed to sustain attention, but too much can hinder your practice
Advanced Mindfulness: Open Monitoring

1. Take a moment to get comfortable, and feel free to close your eyes
2. Settle in by taking a few deep and slow breaths
3. On each exhale, relax more deeply, letting go of tension in the neck and shoulders
4. Allow your breathing to continue at its own natural pace
5. Expand awareness beyond your physical self to your surroundings
6. Be aware of sounds, smells, the touch of air on your skin, light through the eyelids
7. Notice when your mind wanders, then gently bring your attention back to awareness
8. Feel yourself to be unchanging and timeless—even as things come and go around you
9. Practice this exercise for 5-10 minutes
10. Gently open and close your eyes a few times as you complete the practice and return to everyday life

Additional Applications

Integrating Mindfulness into Every Day

• Take a couple of mindful breaths throughout the day to recharge mentally and physically
• Take a moment to monitor your inner and outer experience while walking from one place to another
• Accept what can’t be controlled
• Pause and act with intention to difficult situations, rather than react in the moment

Using Mindfulness to Connect

• Focus on sending positive thoughts to yourself and teammates to foster empathy and build cohesion
• Visualize a place in nature or another place that promotes well-being, calm, safety, and stability – feel free to imagine family, friends, or pets that support you in this safe place

Frequently Asked Questions

Q: What does mindfulness involve?
A: Mindfulness typically consists of exercises that build capacity to focus attention on inner and outer experience.

Q: Do I need to practice for hours every day?
A: Not necessarily. Benefits have been found with as little as 12 minutes a day and can be practiced a few days a week.

Q: Do I have to sit cross-legged in a lotus position?
A: No, you can practice mindfulness in any position you want like walking, lying down, or sitting in a chair.

Q: When should I use mindfulness?
A: Mindfulness can be used when you want to manage stressful moments or restore attention and mental focus. It can also be used to build your capacity to operate under stress.
