

We can be together
again this New Year.
**DON'T WAIT.
GET VACCINATED.**

A hug from Grandma.
A handshake from Dad.
Blowing out the birthday candles.

We've missed too much. But as health care workers, we are eligible to receive the COVID-19 vaccine right away and there is no reason to delay. The vaccine is safe and our pathway back to normal life—spending time with and protecting our loved ones. Many of our fellow health care workers are already getting vaccinated because:

- Experts we trust like Anthony Fauci, MD, confirm the vaccine is safe and effective
- Rigorous vaccine testing prioritized diverse racial and ethnic inclusion and showed minimal side effects

We can be together again safely, but you need to join your fellow members and get vaccinated.

Protect your loved ones and patients. Get vaccinated.
